febrile seizure, serum zinc : Introduction: We performed this study to evaluate the
association between zinc deficiency and febrile seizure. Methods & Materials:

Prospective study of level of serum zinc in patients of febrile seizures, idiopathic epilepsy
and CNS infections. Authors: Chaurasiya Om Shankar,

Serum Zinc Level in Children With Simple Febrile Febrile Convulsion; Zinc; Serum;
Febrile seizures: mechanisms and relationship to epilepsy. Brain Dev

along the nerves to central nervous system. Care Providers and the patients. Key words:
Blood Borne Infections, a prospective study

Our findings do not support the role of reduced serum zinc concentration in febrile
seizure. Mansour Sadeghzadeh, Parisa Khoshnevisasl; acquisition of data:

Decrease of serum zinc level might be responsible for pathogenesis of febrile seizure
(FS). The purpose of this study was to evaluate efficacy and safety of ora

prospective study sought Central nervous system These children were randomized in two
groups A & B. all the patients in the study received

Zinc levels in Febrile Seizure: It can emphasize the hypothesis that there is no relation
between serum zinc level and febrile seizure in children. Keywords.

Prospective Study of Level of Serum Zinc In Patients of Febrile Seizures, Idiopathic Epilepsy and CNS Infections. People J Sci Res 2011; 4(2):1-4.

Serum zinc levels are low in children with simple febrile seizures compared with those in children with epileptic seizures and controls R. GANESH, L. JANAKIRAMAN & B

Low Serum Zinc Level in Febrile Seizure Patients with Relation to Causes of Fever. DISCUSSION. Febrile seizure is a commonly occurring problem in young children.
